museums for changing lives

Did you know that painkillers are the most common cause of accidental poisoning in children in the UK?

The Medicine Chest is a NEW loans resource to help children learn about medicines in the past and today using objects.

Focusing on three key skills, *investigation, interpretation* and *inquiry* the **Medicine Chest** encourages creative learning through a range of cross-curricula activities.

Supporting the Every Child Matters outcomes as well as National Curriculum aims, the **Medicine Chest** aims to support your class to develop a greater understanding of medicine safety.

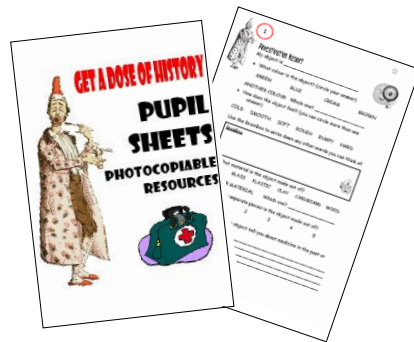

What teachers say:

"The Medicine Chest provides opportunities for learning and discussion around a range of topics. It also enables the children to think creatively and extend their learning."

"Excellent resource!"

"Supports PSHE, particularly SEAL, and offers opportunities for Drug Education Awareness week and Health Week"

What is in the Medicine Chest?

REAL objects to handle! Some of these were used by pharmacists 100 years ago and others are from more modern times

Teachers book with guidance notes and **40** worksheets to photo copy for your class

DVD showing your class how to look after the objects as well as showing how to make pills

CD with additional information, Worksheets, old advertising and great games!

Non-fiction books to help your class find out more

Fiction books for you to use as your class reader or incorporate into Literacy lessons

A *Mr Men* PSHE resource book designed for Key Stage One

What the children say:

"I know not to mess around with medicines"

"In the olden days they learnt leeches would make you feel better"

"It's really good"

"We had a wonderful time!"
