10 June, 2010

Dear Harry

## **Request for details of our experience handling concerns about temporary and occasional registrants**

I have provided below the Society's response to your request for details of our experience handling concerns about temporary and occasional registrants.

## **Have you experienced any difficulty in investigating concerns that have been raised about a temporary and occasional registrant's fitness to practise?**

Although the Society has previously expressed concerns over the potential issues surrounding temporary and occasional registrants, we have to date not registered any temporary and occasional service providers. As such, we have never had to investigate concerns that have been raised about a temporary and occasional registrant's fitness to practise.

## **If so, were these difficulties associated with staying in touch with the registrant, and how were they managed?**

See above.

We would be happy to discuss the issues surrounding temporary and occasional registrants with you if that would be helpful.

Yours sincerely

Jeremy Holmes  
Chief Executive and Registrar
