News from EIPG

The Windsor Framework

UK Prime Minister Rishi Sunak and the European Commission President Ursula von der Leyen announced that agreement had been reached on changes to the operation of the Protocol on Ireland/Northern Ireland. >>

EU Focus

Review of the pharmaceutical legislation, the proposals of the industrial associations

Recent months have seen many proposals arising from the different industrial associations representative of the research-based industry (EFPIA), the generic, biosimilar and value-added medicines sector (Medicines for Europe) and the ATMP sector (Alliance for Regenerative Medicine). The shared target is to contribute to the debate in view of the finalisation of the review of the European pharmaceutical legislation by the EU Commission. >>

Regulatory Affairs

EMA/EFSA joint report on human dietary exposure to residues of veterinary medicines, pesticides and feed additives

The two regulators run the analysis of the exposure methods currently in use, according to the mandate received in 2020 by the EU Commission. The report set forth high-level recommendations on how to better approach the harmonisation of the exposure assessment; further discussion shall be necessary to better detail the needed interventions at the level of different sectional legislative frameworks. >>

Technology & Research

HERA reports on stockpiling of antimicrobials

The two reports analyse the factors that may influence availability of antibiotics in the European market, identify 30 different classes of substances potentially at risk and propose an articulate set of possible solutions to address the issue of shortages under different perspectives. >>
