

**DOCUMENT TITLE: TRAMADOL RESOURCES REVIEW 2021**  
**CLOSING DATE: MONDAY 7<sup>th</sup> JUNE 2021**

Please complete your personal details along with the Consultation Pro-forma **and** the Declaration of Interests form below. Please type directly into the forms and save with your initials (or other appropriate identifier) before returning to [awttc@wales.nhs.uk](mailto:awttc@wales.nhs.uk).

**Please note:** Comments received during consultation are compiled in a report and considered by the development group. Each comment will be addressed and any changes to the document that are made as a result will be noted. The summary report including any comments submitted will be available upon request.

AWTTC reserves the right to summarise comments, where it is deemed appropriate, and to not publish comments if we consider their publication to be unlawful or otherwise inappropriate.

**By submitting your comments, you are agreeing to them being used in line with the above.**

Please allow three weeks from the date of final publication for the summary of consultation comments to be made available.

**CONSULTATION PRO-FORMA**

<b>Page number/section number/ line number</b>	<b>Comment</b>
General	This guidance is for tramadol alone. It would be helpful for similar guidance for all opioids and similar medications. There are some concerns that patient could be switched to alternative medications which may also cause harm
Terminology	The terminology of chronic and acute prescribing may be misleading. We are aware that many prescribing policies enforce acute prescribing for long term medications therefore an acute prescription is not necessarily acute use.
General	It would be helpful to understand why tramadol is initiated. Is it relevant if its long term or short-term?
General	We understand the need to raise awareness amongst prescribers and patients of 27 the potential harms associated with the misuse and diversion of tramadol. However, it would be helpful to understand what action is going to be undertaken with this data? Is there a strategy?
General	There is an audit for primary care, secondary care and emergency departments. There is no audit designed for community pharmacy in this resource. Community pharmacy teams can play a significant role in supporting patients, including some prescribing clinics supporting withdrawal from medications such as tramadol. This is a missed opportunity.
129	We welcome the trend in tramadol DDDs per 1,000 patients which is clearly reducing.

**DECLARATION OF INTERESTS**

Do you have any business or personal interests that might be material and relevant to the project/document under consideration?

<b>Yes</b>	<input type="checkbox"/>
<b>No</b>	<input checked="" type="checkbox"/>

If **yes**, please give details below:
