

**NES strategic plan survey – submitted 01/05/23**

What do you think of our 'Purpose and Vision'?

No comment

What do you think about 'What we do'?

No comment

What do you think about our 'Strategic approach'?

This is a good overall plan for the organisation. It would be useful to know if there will be more detailed plans for the various professions, including pharmacy, planned. If there is it will be vital they align for each profession to the current Scottish Government workforce and recovery plans.

What do you think about 'Our focus for 2023-2026'?

It is great to see topics such as collaboration, accessibility, diversity, innovations, digital and sustainability covered within the plan. It would be great to see more detail about working with other organisations e.g. professional leadership bodies, to ensure education programmes are aligned.

What are the implications for your organisation?

It is not anticipated there would be direct implications for our organisation. However, it is hard to say what the implications for our profession will be due to the generic nature of the strategic plan.
