

APPENDIX 5: Partnership working and Affiliation

The RPS works in partnership with organisations, both within the profession and outside of the profession, across GB and internationally, to ensure the purpose and vision of the RPS is realised for the profession, patient care and public health. The RPS works collaboratively with:

- National pharmacy organisations
- National specialist, clinical and sectoral organisations
- Non-pharmacy organisations e.g. other healthcare professions
- Patient and health charities
- International pharmacy organisations
- International non-pharmacy organisations

The RPS has established formal working relationships with many of these partners, several of these are known as RPS strategic partners. The RPS is also establishing closer working relationships with some partners who are seeking to provide services, e.g. training and education, on behalf of the RPS. These partners are known as RPS affiliate partners.
