

*Total number of near misses:	Total number of prescriptions dispensed:	Near miss error %:
-------------------------------	--	--------------------

*Option to calculate near miss error % for each review period. Can help identify trends e.g. weeks/months when near miss error % is higher. Pharmacy team can then plan ahead for these anticipated periods.

<p>1. What:</p>	<p>2. Why:</p>
<p>4. Review: (of action plan)</p>	<p>3. React: (action plan)</p>
<p>Pharmacist to sign and date 'review of action plan':</p> <p>Name:</p> <p>Signature:</p> <p>Date:</p>	<p>Pharmacist who lead the review: Remaining pharmacy staff to sign and date involvement with review:</p> <p>Name:</p> <p>Signature:</p> <p>Date:</p>
