

# Medicine Supply Notification

MSN/2020/050

Sterculia (Normacol®) 62% w/w granules  
Sterculia & Frangula Bark (Normacol Plus®) 62%/ 8% w/w granules

Tier 2 – medium impact\*  
Date of issue: 27/08/2020

## Summary

- Normacol® and Normacol Plus® granules are out of stock until 13<sup>th</sup> September 2020.
- Unlicensed imports of Sterculia 62% w/w granules and Sterculia 62% w/w with Frangula Bark 8% w/w can be sourced.
- UKMi have provided clinical advice on switching to alternative preparations.

## Actions Required

Where patients have insufficient supplies to last until the re-supply date, clinicians should:

- review if treatment is still required;
- consider switching to alternative preparations (see supporting information below); or
- consider prescribing unlicensed imports, if alternative preparations are not considered appropriate. Prescribers should work with local pharmacy teams to ensure orders are placed within appropriate time frames as lead times may vary (see supporting information below).

## Supporting information

### Clinical Advice:

Table 1: Alternatives to Normacol® and Normacol Plus® granules

Product	Container	Dosage	Alternative oral preparation
Normacol® (sterculia) granules	Sachets or lined box of granules	1 or 2 sachets or 1-2 heaped 5ml spoonfuls, once or twice daily after meals.	Ispaghula husk* (one sachet up to twice a day)
Normacol Plus® (sterculia / frangula) granules	Sachets or lined box of granules	1 or 2 sachets or 1-2 heaped 5ml spoonfuls, once or twice daily after meals.	Ispaghula husk* (one sachet up to twice a day) with stimulant, e.g. senna (7.5mg – 15mg) at night or bisacodyl (5mg-20mg) tablets.

\*if ispaghula products are not suitable/tolerated, methylcellulose is an alternative bulk-forming laxative

- Due to the aspartame content, ispaghula products are not suitable for patients with phenylketonuria.
- Due to maltitol content, senna syrup is not suitable for patients with hereditary problems of fructose intolerance.

#### Guidance on ordering and prescribing unlicensed imports

- The following specialist importers have confirmed they can source unlicensed sterculia granules and sterculia granules/frangula bark granules (please note there may be other companies that can also source supplies):

Importer	Product	Container
Alium Medical	Normacol®	Sachets
Durbin PLC	Sterculia granules (Normafibre brand)	Lined box
	Sterculia granules (Normafibre brand)	Sachet
	Sterculia granules/ Frangula bark (Generic)	Lined box
Target Healthcare	Normacol Plus®	Lined box

- Any decision to prescribe an unlicensed medicine must consider the relevant guidance and NHS Trust or local governance procedures. Please see the links below for further information:
  - [Prescribing unlicensed medicines](#), General Medical Council (GMC),
  - [The supply of unlicensed medicinal products](#), Medicines and Healthcare products Regulatory Agency (MHRA)
  - [Professional Guidance for the Procurement and Supply of Specials](#), Royal Pharmaceutical Society
- When prescribing a product that is not licensed in the UK due to a supply issue with the licensed alternative prescribers must indicate on the FP10 prescription that an unlicensed product is required. This can be done by annotating the prescription with the following wording: “**special order**”.
